Children and Youth in North Carolina:

Overweight or obese	30%
Not getting recommended fruit servings	37%
Not getting recommended vegetable servings	74%
Not getting recommended physical activity	27%

As a result...

- Children's life expectancy is declining due to an increase in overweight¹
- One in three American children born in 2000 will develop diabetes in their lifetime²

However...

- Active young people are more likely to remain active as adults³
- Family meals are associated with a greater intake of fruits and vegetables and fewer fried foods and soft drinks⁴

2007 County Highlights:

- Providers at 15 daycare centers are implementing a physical activity and healthy eating curriculum
- Seven African-American churches are implementing physical activity and healthy eating programs
- One community created walking trails to be used by the public

Where and how changes can be made in all counties:

Community	Increase access to places for physical activity, create farmers' markets and/or farm stands
Schools	Ensure children receive quality physical education, implement nutrition standards
Worksite	Offer physical activity classes, provide nutrition counseling
