Children and Youth in North Carolina:

Overweight or obese	30%
Not getting recommended fruit servings	37%
Not getting recommended vegetable servings	74%
Not getting recommended physical activity	27%

As a result...

- Children's life expectancy is declining due to an increase in overweight¹
- One in three American children born in 2000 will develop diabetes in their lifetime²

However...

- Active young people are more likely to remain active as adults³
- Family meals are associated with a greater intake of fruits and vegetables and fewer fried foods and soft drinks⁴

2007 County Highlights:

One community completed the construction of a new pool and wellness center

County schools have included in their improvement plan that all students be instructed about proper nutrition and receive daily physical activity for at least 30 minutes

Where and how changes can be made in all counties:

Community	Increase access to places for physical activity, create farmers' markets and/or farm stands
Schools	Ensure children receive quality physical education, implement nutrition standards
Worksite	Offer physical activity classes, provide nutrition counseling
