Meets physical activity recommendation	F	
Meets fruit and vegetable recommendation	F	

*Using 2006 BRFSS data, NC counties were ranked and then graded according to their position within that ranking. Ranks above the 60th percentile mark received grades A+ through D-; scores below received an F

In Edgecombe County, residents are most likely to...**

- ...some think of the calories in what they eat
- ...prefer fast food to home cooking and buy from fast food restaurants 14 or more times per month
- ...most do not exercise regularly; some exercise once or twice per week
- ...recognize the need to exercise more

**Claritas iMARK™ Online, PRIZM 2006

Children and Youth in North Carolina:

Overweight or obese	30%
Not getting recommended fruit servings	37%
Not getting recommended vegetable servings	74%
Not getting recommended physical activity	27%

As a result...

- Children's life expectancy is declining due to an increase in overweight¹
- One in three American children born in 2000 will develop diabetes in their lifetime²

However...

- Active young people are more likely to remain active as adults³
- Family meals are associated with a greater intake of fruits and vegetables and fewer fried foods and soft drinks⁴

2007 County Highlights:

- Three elementary schools implemented physical activity curricula
- One local community adopted plans to increase and expand bicycle routes
- Three schools increased the number of healthy options in their cafeterias

Where and how changes can be made in all counties:

Community	Increase access to places for physical activity, create farmers' markets and/or farm stands
Schools	Ensure children receive quality physical education, implement nutrition standards
Worksite	Offer physical activity classes, provide nutrition counseling
